

# GO MaxRIP

FOR SCREEN PRINTERS

## Twelve Reasons to Try GO MaxRIP:

1. MaxRIP is not just a modified driver, it includes professional features for creating positive screen films for screen printers.
2. MaxRIP prints directly from popular graphic and artwork programs.
3. MaxRIP previews and proofs RIP'd images before sending to printer for imaging.
4. MaxRIP is fully featured, easy-to-use with features usable by both beginners and professionals.
5. MaxRIP separates CMYK, RGB and mixed color files or can use pre-separated files--no separate \$700 color separation software needed.
6. MaxRIP uses either preprogrammed screens, angles and resolutions or can use customized ones. Screens and angles are adjustable for each color.
7. MaxRIP receives and images PDF, EPS and Postscript files.
8. MaxRIP offers built-in density curves for use with GO's film and ink line or users can create your own densities within MaxRIP. Density curves can be changed for each color plate or can be used for all plates.
9. MaxRIP supports the use of ICC and ICM color profiles.
10. MaxRIP reprints pages without re-ripping. A great time-saver.
11. MaxRIP's workflow allows users to change printing priorities, change the quantity of images printed and see what has been processed for printing.
12. MaxRIP allows the use of all or a combination of ink slots to be used with black GO dMax 4 ink.
