

Eye-One iO

GO INFO

- Eye-One iO will provide consistent and reliable results
- Increase productivity
- lower the level of operator skill required
- reduce the risk of errors

A new level of automation for fast, accurate test chart reading! More than ever before, Eye-One delivers a complete solution for all color measurement and color management needs. The new Eye-One iO provides a new level of automation for fast, automated test chart reading, adding even more versatility to the award-winning Eye-One system.

It is ideal for creative professionals, photographers, prepress, corporate design, ad agencies, as well as for print for pay, fine arts, sign shops, textile printing, large format printing and high speed digital printing environments.

Available in two reflective scanning options: white or black backing

With the new level of versatility and expansion potential the Eye-One iO delivers, there's no reason to put off buying an Eye-One Pro solution. If you're interested in accurate color, this is the configuration you've got to have! Begin taking advantage of all the benefits Eye-One solutions offer today.

Add Eye-One iO automated scanning table at any time!

*Eye-One iO will be compatible with ALL Eye-One Pro devices
