

# GO BannerUp Media

*The First Media Specifically For Banner Stands*

INFO SHEET

### Key Features

- High-quality 13 mil microporous coated media
- Anti-curl back coating
- Produces high quality photographic imaging prints
- Microporous coating ensures fast drying along with water resilience
- Maximizes the efficiency of display systems
- Sizes from 24" x 100' and 36" x 100'

### Applications

GO BannerUp is developed specifically for display systems and offers a unique anti-curling back coating which makes the media flat and straight for ease of use. GO BannerUp offers 13 mil of microporous coated media weight and features a specially formulated coating and includes four front face coats for truly universal and high quality photographic printing. In Addition, GO's BannerUp is a perfect complimentary marketing tool for capturing the attention of your audience during tradeshows, outside/indoor store signage, promotional imaging, and any other application that requires you to expose the product to a market. BannerUp works great with most Graphics One displays including Megabanner, YPlay, Billboard, EzDisplay, EzBanner, Springer and Human POP.

### Packaging
