Opportunities

GO CutsIt rotary cutters and trimmer are large format high quality rotary trimmers with GO value pricing. They are designed for fast, accurate trimming with blades that cut in both directions. GO CutsIt is recommended for cutting flexible items such as papers, films, vinyl, and plastics up to 30 mil thick (a rotary cutter will not cut foam boards or thicker materials). Rotary paper trimmers are widely used by photographers, sign companies, corporate accounts and others because of their slick, precision cutting.

GO CutsIt Rotary Cutters and Trimmers

A Rotary paper trimmer cuts paper differently than traditional paper trimmers. A rotary trimmer has a round blade attached in a cutting head that slides along a metal guide bar. The round blade slices as the cutting head slides along the bar. GO CutsIt Rotary Cutters Trimmers are easy to use and come in many different sizes. Unlike other trimmers, GO CutsIt includes the stand with the purchase of one rotary trimmer for a reasonable price with high quality. We also have two spare blades : 1. round blade only and 2. the whole set of rotary blades (with blade housing) available as replacements.

FAQ's**Q. What kind of cutting technology does GO CutsIt uses?**

A. GO CutsIt uses Rotary Cutting, A Rotary paper trimmer cuts paper differently than traditional paper trimmers. A rotary trimmer has a round blade attached in a cutting head that slides along a metal guide bar. The round blade slices as the cutting head slides along the bar. Rotary paper trimmers are widely used because of their slick, precision cutting.

Q. For which materials GO CutsIt is recommended?

A. GO CutsIt is recommended for cutting flexible items such as papers, films, vinyl, and plastics up to 30 mil thick (a rotary cutter will not cut foam boards or thicker materials.)

Q. What do I need to consider before purchasing a GO CutsIt?

A. The type and size of media you will cut are the major factors. Different materials require different types of cutters/trimmers, Please make sure the one you choose will be appropriate since some of the materials you will work with are photographs, cardstock, thin plastic, standard copy paper, vinyl and many other digital printing substrates.

Q. What size of media can I cut with GO CutsIt?

A. Paper trimmers come in a wide variety of sizes. You may want a trimmer that cuts different sizes of paper, or a smaller trimmer for lighter projects. That is why GO CutsIt is available in different sizes and can cover all your needs. Our GO CutsIt come in the following sizes 18", 26", 38" 51", 57" and 78"

Q. What space/mobility considerations I need to make before I select GO CutsIt?

A. Will your trimmer be in a stationary location or will it be moved to different areas? Some paper trimmers are made for desktop use. They are light and easy to move from spot to spot. Others are large and need more space. If you require a larger trimmer but still need mobility it will be easy since GO CutsIt are light and easy to move.

Q. What is the standard life of the GO CutsIt blade?

A. The standard use time of the round blade is at 5,000 times in full capacity. Because it is self-grinding round blade when cutting, if you do not use the CutsIt to cut hard material, then the self grinding blade can have a longer life. Even when the blade is blunt or broken, you can easily change the blade yourself.

Q. Do all CutsIt come with a stand and waste catcher?

A. All units sized 18-inches and 26-inches are meant to be used on a tabletop and do not have stands or waste catchers. Starting with our 38-inch unit, all the larger stands come with a high quality stand and a expansive waste catcher.
