

GO GatorGrip

- Comes in 12, 24, 36 and 48 Inch Sizes
- Mounts to Walls, Foam Board, Fabric Board and Frames
- Similar in Concept to Velcro -- But Much Stronger
- Uses Strong Adhesives or Screws for Mounting

What is the GO GatorGrip?

GO's patent pending GatorGrip system provides a movable mounting system not currently available. Using high strength thermoplastic mounting strips coated with special adhesive formulation, GatorGrip establishes a new standard for flat board mounting. GatorGrip is extruded high strength plastic and can be used over and over again. Since GatorGrip was developed specifically for flat boards, it has mounting capabilities not offered by Velcro or other metal type hangers.

Comprised of two pieces of high strength plastic, one part of GatorGrip is mounted on the wall and one piece is mounted on the wall or whatever surface is desired. Mount the image on the foamboard and snap in. Want to change the image, no problem. Just pull the foam board and the GatorGrip pieces quickly separate. Put a new image on the foam board and then snap the board back into place. It is really simple. GatorGrip can be used with virtually any foam mounting board including Gatorfoam, Foam-Cor, Sinta and many other types of foam board.

What sizes are available for the GatorGrip?

GO now offers the GatorGrip in three new sizes:

- GatorGrip 12 inch
- GatorGrip 24 inch
- GatorGrip 36 inch

All sizes come in a package of 10 each.
