## Description

Outdoor and indoor signs are fast becoming a permanent feature along our streets, shopping malls and superstores. These stands are a most exciting marketing portable signage medium, giving instant advertising or information. GO's new Springer provides flexible signage for long lasting branding or the ability to change the message with the poster based signs. The message can change from month to month or even from day to day. The water filled bases makes the stand perfectly stable and easy to move. GO's Springer has a banner display width of over 20-inches on standard or 24-inches in "Wide." Banners mounted on the GO Springer can be seen from long distances, even from a moving car.

The new GO Springer display system is made of corrugated plastic for mounting posters. The system can be erected in less than five minutes and is very easy to move. With a unique water filled base constructed of durable plastic, GO's Springer is stable even on semi-windy days. The unit will last in inclement weather for an extended period of time.

## Ideal Applications

GO Springer is a perfect marketing tool for capturing the attention of your audience during tradeshows, outside/indoor store signage, promotional imaging, and any other application that requires you to expose the product to a market.

## Who needs GO Springer?

GO Springer display system is the perfect marketing and visual communication tool that your company needs in order to get your logo and brand name noticed! As a flexible display unit in the marketplace, GO Springer allows you to promote your products with confidence. Its format allows you to display images that are printed on virtually any media, without having to worry about damage to the print. GO Springer is the ideal accessory for any professional who wants to grab the attention of a larger audience.
