

GO Billboard

- First and Largest Portable Display Available
- Over 64 Square Feet of Image
- Maximum Visibility from Any Distance
- Stainless Steel Construction
- Stable for Outdoor Use

Description

With an image size of 64 square feet, your customers will take notice! The new GO Billboard display is perfect for eye-catching large-format graphics. GO Billboard is the largest portable stand available with an image display size of 6.5 feet high by 10 feet wide (2 m by 3.1 m)– five times larger than other average displays!

GO Billboard is constructed from stainless steel, but despite its large size and durability GO Billboard requires no tools to assemble. Its spring construction withstands breezes and bumping, while its heavy duty water filled base allows for stability indoors and outdoors. It is constructed for use with any type of durable media. GO Billboard is ideal for any user who wants high-impact visibility.

Ideal Applications

GO Billboard is the marketing and visual display that gives your company the means to get your name and logo noticed! GO Billboard captures the attention of your audience during tradeshow, outside store signage, promotional imaging, and any other application that requires you to expose the market to your product.

Positioning

The new GO Billboard is unmatched in the sign market. With a image display size that is six and a half feet tall by ten feet wide, graphics can be seen from far away. The system consists of stainless steel construction with spring joints to withstand breezes and bumping. GO Billboard is the ideal display for any professional looking to grab the attention of a larger audience. The GO Billboard is such a strong marketing tool your customers will never forget your message.
