

## Top Ten Reasons to Offer GO's T3170x SP System

**We manufacture our own color separation ink in an automated factory in the midst of the Silicon Valley.** We have been manufacturing this type of ink for the last twenty years and are the leading provider of color separation ink.

**Our ScreenMate™ ink offers up to a dMax of 5.0 and UV light absorption of 99.9% at price up to 50% less than our competition.** The quality and feature set of our ink is unrivaled in the screen print world.

**We offer the highest quality imaging of any 24-inch turnkey solution.** The GO turnkey solution offers professional film positives for screen printers utilizing our ScreenMate™ Ink/Film, the GO T3170x SP and the CADLink® FilmMaker RIP.

**The GO T3170x SP is robust and meant for years of technical imaging.** Not only does the GO T3170x SP include the latest MicroTFP printhead but being able to drive this printer in its highest resolution means a user will have professional results every time.

**CADLink's FilmMaker version for the GO T3170x SP includes high-end screen print controls and the ability to image at a much higher line screen.** CADLink's RIP drives the printer in native mode, not as a Windows driver, which means we have far more control over dot shapes, black density and line screen. Our competition is limited to only 65 LPI, whereas we offer much higher—industrial—LPI.

**The CADLink® RIP includes InRIP color separations.** Why use a third-party application or pay hundreds more for a product which does not offer true screen capabilities?

**Our ScreenMate™ Film has a microporous coating and is water resistant.** GO's ScreenMate™ film has been offered by GO for over a decade with outstanding results and consistency for screen printers.

**The main competitor to our system has a limited RIP, no InRIP color separation and the ink is a standard pigment ink.** Our system offers far more capabilities at a lower price with better margins for you.

**The ScreenMate™ family of products will be expanded to include other sized printers, including a new 13"x 19" turnkey system.** Not only will you have a full range of screen products, but will also have an opportunity for new products in other market applications.

**Our margin structure provides you with ongoing revenue opportunities on consumables.** Even though you make better margin with our product, your customers also benefit with a much better system, much better ink and much better pricing
